

**REMARKS**

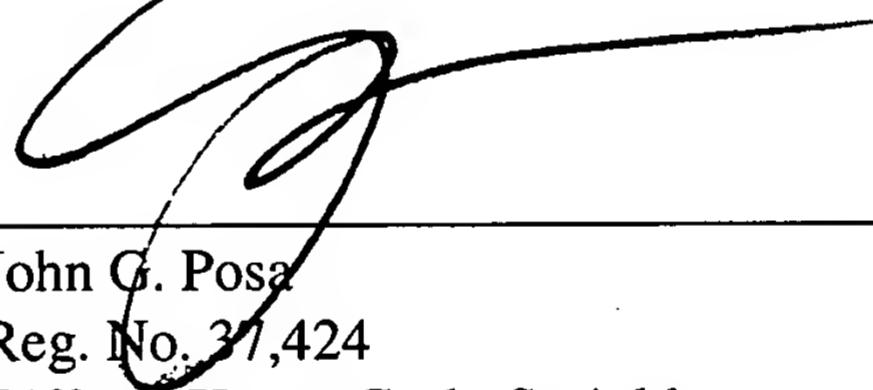

Attached herewith is a Revocation of Prior Powers executed by a representative of the assignee of the present application.

By this amendment, new claims 9-12 have been added, and previous claims 1-8 have been canceled. New independent claim 9 combines limitations of previous claims 1 and 4-7, and therefore should place this case in condition for allowance. Although claim 9 does not include the further limitation of an indexing mechanism including a spherical ball, it is believed that this claim, and those which depend therefrom, distinguish over the cited prior art in that the arrangement allows for axial alignment to terminate oscillation in response to a sufficient constrain.

Questions regarding this application may be directed to the undersigned attorney by telephone, facsimile or electronic mail.

Respectfully submitted,

By:
